

To be posted on relevant websites, newsletters etc. (MDA, Periodic Paralysis Association, etc.)

Research in Periodic Paralysis:

A research study for patients with periodic paralysis who are 18 years of age or older is being conducted in North America and Europe. This research study will evaluate the effectiveness of Dichlorphenamide and Acetazolamide to treat the disease, to see which is more effective and to study the long-term effects of both drugs.

This study is under the direction of Dr. Robert C. Griggs, Chair of the Department of Neurology at the University of Rochester.

Centers participating in the study:

University of Rochester, Rochester, NY
Brigham and Women's Hospital, Boston, MA
Columbia-Presbyterian Medical Center, New York, NY
Mayo Clinic, Rochester, MN
Ohio State University, Columbus, OH
University of California at San Francisco, CA
University of Kansas Medical Center, Kansas City, KS
University of Texas Southwestern at Dallas, TX
London Health Science Center, London, Ontario, Canada
Hopital Pitie-Salpetriere, Paris, France
Institute of Neurology, London, United Kingdom
University of Milan, San Donato, Milan, Italy

If you are interested in participating in this study please contact us, and we will send you more information.
